Born: 9 February 1980 — Rome, Italy

Website: <http://www.roma1.infn.it/santanastasio/index.php>

Current Position

Assistant Professor (Ricercatore Tempo Determinato di Tipo B)
Department of Physics, Sapienza Università di Roma, Rome, Italy

Research field

My research field is the experimental high-energy physics. Since 2006 I am part of the CMS collaboration, one of the 4 experiments running at the CERN Large Hadron Collider (LHC) in Geneva.

Employment History

- 03/2014 - today **Assistant Professor in Physics**
Sapienza Università di Roma, Rome, Italy
- 09/2011 - **CERN Research Fellow in Experimental Particle Physics**
12/2013 SUPERVISOR: Dott. Maurizio Pierini (CERN)
CERN, Geneva, Switzerland
- 12/2007 - **Post-Doctoral Research Assistant (Post-Doc) in Particle Physics**
08/2011 SUPERVISOR: Prof. Sarah Eno (UMD)
University of Maryland, College Park, MD, US
- 11/2004 - **PhD in Physics**
01/2008 “Search for Supersymmetry with Gauge-Mediated Breaking using high energy photons at CMS experiment” [59]
ADVISORS: Prof. Egidio Longo, Prof. Shahram Rahatlou, Dott. Daniele del Re (Sapienza)
Sapienza Università di Roma, Rome, Italy
- 09/1998 - **Laurea in Physics** (highest honors)
05/2004 “Calibration of an electromagnetic calorimeter using the energy flow method” [60]
ADVISORS: Prof. Egidio Longo (Sapienza), Dott. Riccardo Paramatti (INFN)
Mark: 110/110 “magna cum laude”
Sapienza Università di Roma, Rome, Italy

Research Grants

- 08/2013 **Vincitore del Programma Per Giovani Ricercatori “Rita Levi Montalcini”**
[Risultati Bando 2010](#)
Three-year grant for research in experimental high-energy physics with the CMS detector at the CERN LHC

Invited Talks at Conferences

- 06-14/07/2016 **ICNFP2016** - International Conference on New Frontiers in Physics, Kolymbari, Crete, *“Searches for BSM physics in final states with jets and leptons+jets at CMS”* [30]
- 02-09/07/2014 **ICHEP2014** - International Conference on High Energy Physics, Valencia, Spain, *“Search for heavy resonances decaying to bosons with the ATLAS and CMS detectors”* [31]
- 08-10/05/2013 **Workshop LHCpp 2013** - VI Workshop Italiano sulla Fisica p-p a LHC, Genova, Italy, *“Hadronic Resonances at ATLAS and CMS”* [32]
- 12-15/09/2012 **PIC2012** - XXXII Physics in Collision 2012, Strbske Pleso, Slovakia, *“Exotic Phenomena Searches at Hadron Colliders”* [33]
- 13-20/03/2011 **Moriond/EW 2011** - Rencontres de Moriond on “EW Interactions and Unified Theories”, La Thuile, Italy, *“Exotica Searches at CMS”* [34]
- 19-23/04/2010 **DIS2010** - XVIII International Workshop on Deep-Inelastic Scattering and Related Subjects, Firenze, Italy, *“Searches With Early Data At CMS”* [35]
- 15-17/04/2009 **IFAE2009** - Incontri di Fisica delle Alte Energie, VIII Edizione, Bari, Italy, *“Prospects for Exotica Searches at ATLAS and CMS Experiments”* [36]

Review Committes

- 06/2016 - today Referee of *New Journal of Physics* [link to online journal](#) (2015 impact factor = 3.570)
- 2011 - today Member of the internal *“Analysis Review Committees”* for the scrutiny of public results of the CMS collaboration [14, 15, 25, 13]

Citation Report

Last updated on 13/11/2016

Total number of publications: 536 [inspire link](#)

Total number of publications from 01/01/2011 (last 5 years): 484 [inspire link](#)

Total number of citations from 01/01/2006 (last 10 years): 53317 [inspire link](#)

Hirsch h index from 01/01/2006 (last 10 years): 112 [inspire link](#)

I’m author of 31 internal notes and 7 conference reports of the CMS experiment.

Teaching

- 03/2015 - today **Corso di Fisica I, Sapienza, Corso di Laurea in Chimica Industriale**
Professor of mechanics and thermodynamics at chemistry majors
- 10/2005 - 02/2006 **Corso di Fisica I, Sapienza, Corso di Laurea in Matematica**
Teaching assistant of mechanics at mathematics majors

Academic Responsibilities

- 10/2014 - today **“Referente di Con.Sienze per la Facoltà di SMFN” at Sapienza**
Organization of verification tests required for student registration at first year of University in science faculty
- 09/2015 - today **Member of “Commissione Didattica del CdL in Chimica Industriale” at Sapienza**
Coordination and rationalization of academic activities and teaching programs in undergraduate courses for chemistry majors

Student Supervision

I have been the thesis supervisor or co-supervisor of the following students at Sapienza:

- 2016-2017 **Alfonso Tanga (undergraduate)**, “Search for new resonances in final states with jets in proton-proton collisions at $\sqrt{s} = 13$ TeV”, Thesis ongoing
- 2015-2017 **Simone Gelli (PhD)**, “Search for new particles decaying into diboson final states in proton-proton collisions at $\sqrt{s} = 13$ TeV using jet substructure techniques”, Thesis ongoing
- 2014-2015 **Giulia D’Imperio (PhD)**, “Search for narrow resonances in dijet final states at the LHC with $\sqrt{s} = 13$ TeV” <http://www.roma1.infn.it/cms/tesiPHD/dimperio.pdf> [1]

During my convenerships of analysis groups and postdoc appointments in the CMS experiment, I supervised the research activity of the following students from different institutions:

- 2015-2017 **Federico Preiato (PhD)**, Sapienza University of Rome, Italy
“Search for heavy resonances in the dijet final state and jet energy calibration” [?, 37]
- 2012-2015 **Emine Gurpinar (PhD)**, Cukurova University, Turkey
“Searches for heavy resonances decaying to pair of jets at CMS” [3, 5]
- 2012-2014 **Shuai Liu (PhD)**, Peking University, China
“Searches for beyond Standard Model $WW \rightarrow \ell\nu qq$ resonances at CMS” [6]
- 2012-2014 **Edmund Berry (PhD)**, Princeton University, USA
“Searches for first-generation leptoquarks at CMS with $\sqrt{s} = 7$ and 8 TeV data” [16, 17]
- 2010-2011 **Dinko Ferencek (PhD)**, University of Maryland, USA
“Searches for First-Generation Leptoquarks at CMS with early $\sqrt{s} = 7$ TeV data” [18]
- 2008-2009 **Elizabeth Twedt Lockner (PhD)**, University of Maryland, USA
“Feasibility study of First-Generation Leptoquark searches at CMS” [27]

Scientific Coordination in the CMS experiment

- 09/2016 - today **Coordination of the *CMS Exotica Jets+X Working Group***
I started my 2-year mandate on September 1st, 2016. This analysis group works on searches for new physics beyond the Standard Model in final states containing jets. The group, constituted by more than 50 physicists working in universities and research institutions from all the world, performs about 10 physics analyses in this final state. The results of these searches are expected to be published in 2017.
- 09/2014 - **Coordination of the *Dijet Resonance Team* of the CMS experiment**
09/2016 This analysis team works on searches for new massive resonances at the TeV scale decaying into a pair of jets using the dijet mass spectrum. It is constituted by almost 20 physicists from several institutions from all the world. This group produced two high-impact papers using proton-proton collisions at $\sqrt{s} = 13$ TeV [?, 1], including the first published limits in the dijet final state on the mass of a mediator of the interaction between dark matter and standard model particles.
- 01/2013 - **Coordination of the *CMS Exotica Leptons+Jets Working Group***
01/2015 This analysis group works on searches for new physics beyond the Standard Model in final states containing leptons and jets. The group, constituted by more than 50 physicists working in universities and research institutions from all the world, performed about 15 physics analyses in this final state. During my convenership, the group produced 3 publications [11, 12, 6] and 7 preliminary results that were then published or submitted for publication in 2015 (including [9, 10, 16]).
- 03/2012 - **Coordination of the *Dataset Definition Team* of the CMS experiment**
03/2013 Definition of the trigger requirements forming the data streams used for physics analysis and detector calibration. This responsibility also consists in the design and implementation of a novel strategy for *data parking* and *data scouting* [28]. LHC searches for new particles with sub-TeV masses are hindered by the high thresholds required to limit trigger rates. The new technique of data scouting, based on online event reconstruction and small record sizes, allows to lower trigger thresholds and extend searches for new particles into hitherto unexplored regions.
- 09/2008 - **Coordination of the *Prompt Feedback Group* of the hadronic calorimeter of the CMS experiment (HCAL)**
09/2010 Monitoring and data analysis concerning problems in the detector during cosmic-ray data-taking. The group was formed by almost 10 students and postdocs working on HCAL detector studies in early data taking periods.

Highlights of Research Activities in the CMS experiment

- 09/2011 - today Leading author of searches for resonances at TeV mass scale decaying into a pair of jets (dijet) using the dijet mass spectrum in proton-proton collisions at $\sqrt{s} = 7$ TeV [5, 46], 8 TeV [4, 45, 3, 44], and 13 TeV [1, 40, 39] with the CMS detector. The search for new dijet resonances is among the most important ones at LHC because any hypothetical new particle that might be produced originates from the colliding protons and therefore it must couple to quarks and/or gluons. This search is sensitive to the presence of a hypothetical, massive mediator of the interaction between dark matter and standard model quarks. These papers received in total almost 500 citations at 13/11/2016.

- 09/2011 - today Proponent of a novel trigger, data acquisition, and analysis strategy to recover sensitivity to new dijet resonances at dijet masses below 1 TeV [28] (*data scouting*). Leading author of searches for dijet resonances using the data scouting technique at $\sqrt{s} = 7$ TeV [26] and $\sqrt{s} = 8$ TeV [2, 41]. Supervision of PhD student at Sapienza working on calibration of online reconstructed jets for the scouting analysis at $\sqrt{s} = 13$ TeV [?, 38]. It is important to extend the dijet search in the mass region below 1 TeV in order to probe hypothetical hadronic resonances with small couplings to quarks and gluons that similar searches performed at previous colliders could not find yet.
- 12/2011 - Primary author of searches for heavy resonances decaying to WW / ZZ / WZ / qW / qZ
09/2014 in semi-leptonic $\ell\nu q\bar{q}'$ / $\ell\ell q\bar{q}$ [6, 42, 43] and fully hadronic [7, 47, 8, 48] final states at CMS using jet substructure techniques to identify the hadronic decays of boosted vector bosons. The investigation of the di-boson production at high center-of-mass energy is a necessary ingredient for the understanding of the origin of the electroweak symmetry breaking and to disentangle the nature of the Higgs boson.
- 12/2007 - Leading author of searches for pair production of first generation scalar Leptoquarks (LQ)
12/2014 in the decay channels $LQ\bar{L}Q \rightarrow eeqq$ [19, 27, 52, 53] and $LQ\bar{L}Q \rightarrow evqq$ [18, 51] with the CMS detector using the first 36 pb⁻¹ of LHC collisions at $\sqrt{s} = 7$ TeV. Primary author of the LQ analysis updates with full dataset at $\sqrt{s} = 7$ TeV [17, 50] and author of the 8 TeV analysis [16, 49]. These searches are sensitive to signals from Supersymmetry models with R-Parity violation that foresee stop $\rightarrow eq$ decays.
- 11/2009 - Commissioning of missing transverse energy (MET) reconstructed with the first proton-
09/2010 proton (pp) collisions at $\sqrt{s} = 0.9$ and 2.36 TeV collected by the CMS experiment [29, 54, 55].
- 11/2009 - Development and implementation of algorithms for the identification of anomalous, beam-
09/2010 induced signals in the CMS hadronic forward calorimeter at $\sqrt{s} = 0.9, 2.36$ and 7 TeV [56, 21].
- 06/2009 - Commissioning and calibration of the “*delay wire chambers*” used for beam position mea-
07/2009 surements during the test beam of the hadronic calorimeter (HCAL) of the CMS experiment in 2009 [20].
- 01/2008 - Commissioning of the hadronic calorimeter of the CMS experiment: expert “on-call” for
07/2008 trigger and data acquisition operations during early cosmic-ray data-taking.
- 12/2006 - Feasibility study of the search for Gauge Mediated Supersymmetry Breaking models in the
12/2007 prompt photon decay channel $pp \rightarrow \tilde{\chi}_1^0 \tilde{\chi}_1^0 + X \rightarrow \tilde{G}\tilde{G}\gamma\gamma + X$ [59], with simulation of the CMS detector.
- 07/2006 - Monitoring of the high voltage system of the CMS electromagnetic calorimeter (ECAL) and
11/2006 data-taking shifts in the combined ECAL+HCAL test beam in 2006 [22].
- 03/2006 - Analysis and test of stability of ECAL high voltage system [24].
11/2006
- 10/2005 - Feasibility study of the calibration of the CMS ECAL using $\pi^0 \rightarrow \gamma\gamma$ decays [23, 57, 58].
10/2006

- [14] [CMS Collaboration], “Search for exotic resonances decaying into WZ/ZZ in pp collisions at $\sqrt{s} = 7$ TeV”
JHEP 1302, 036 (2013), arXiv:1211.5779 [hep-ex].
I was member of the “*Analysis Review Committee*” for the scrutiny of the ZZ search in jet plus missing transverse energy final state within the CMS collaboration.
- [15] [CMS Collaboration], “Measurement of the $t\bar{t}$ production cross section in the all-jet final state in pp collisions at $\sqrt{s} = 7$ TeV”
JHEP 1305, 065 (2013), arXiv:1302.0508 [hep-ex].
I was member of the “*Analysis Review Committee*” for the scrutiny of this analysis within the CMS collaboration.
- [16] [CMS Collaboration], “Search for pair production of first and second generation leptoquarks in proton-proton collisions at $\sqrt{s} = 8$ TeV”
Phys. Rev. D 93, 032004 (2016), arXiv:1509.03744 [hep-ex].
I supervised the main analyst (a PhD student from Princeton University) of the first-generation search included in this CMS paper based on collision data.
- [17] [CMS Collaboration], “Search for pair production of first- and second-generation scalar leptoquarks in pp collisions at $\sqrt{s} = 7$ TeV”
Phys. Rev. D 86, 052013 (2012), arXiv:1207.5406 [hep-ex].
I supervised the main analyst (a PhD student from Princeton University) of the first-generation search included in this CMS paper based on collision data.

- [18] [CMS Collaboration], “Search for First Generation Scalar Leptoquarks in the $e\nu jj$ channel in pp collisions at $\sqrt{s} = 7$ TeV”
Phys. Lett. B 703, 246 (2011), arXiv:1105.5237 [hep-ex].
I am the contact person and one of the two analysts (from University of Maryland group) of this CMS paper based on collision data.
- [19] [CMS Collaboration], “Search for Pair Production of First-Generation Scalar Leptoquarks in pp Collisions at $\sqrt{s} = 7$ TeV”
Phys. Rev. Lett. 106, 201802 (2011), arXiv:1012.4031 [hep-ex].
I am one of the four analysts (from University of Maryland group) of this CMS paper based on collision data.
- [20] [CMS HCAL Collaboration], “Study of various photomultiplier tubes with muon beams and Cherenkov light produced in electron showers”
JINST 5, P06002 (2010).
The data used in this study were collected during the HCAL Test Beam 2009. I contributed to commissioning and calibration of the “*delay wire chambers*” installed along the H2 beam line (CERN, Preveessin site) for beam position measurements.
- [21] [CMS Collaboration], “Identification and Filtering of Uncharacteristic Noise in the CMS Hadron Calorimeter”
JINST 5, T03014 (2010), arXiv:0911.4881 [physics.ins-det].
I supervised a PhD student at University of Maryland working at the the development and implementation of algorithms for the identification of anomalous, beam-induced signals in the CMS hadronic forward calorimeter at $\sqrt{s} = 0.9, 2.36$ and 7 TeV.
- [22] [USCMS Collaboration and ECAL/HCAL Collaboration], “The CMS Barrel Calorimeter Response To Particle Beams From 2-GeV/C To 350-GeV/C”
Eur. Phys. J. C 60, 359 (2009), [Erratum-ibid. C 61, 353 (2009)].
I monitored the high voltage system of the CMS electromagnetic calorimeter (ECAL) and performed data-taking shifts in the combined ECAL+HCAL test beam in 2006.
- [23] [CMS Electromagnetic Calorimeter Group], “Intercalibration of the barrel electromagnetic calorimeter of the CMS experiment at start-up”
JINST 3, P10007 (2008).
I performed a feasibility study of using $\pi^0 \rightarrow \gamma\gamma$ decays for the calibration of the ECAL crystals, with full detector simulation.
- [24] [F. Santanastasio *et al.*], “High voltage system for the CMS electromagnetic calorimeter”
Nucl. Instrum. Meth. A 582, 462 (2007).
I performed part of the stability tests on the high voltage boards at CERN laboratory and most of the data analysis.

PRELIMINARY RESULTS OF THE CMS COLLABORATION (RELATIVE TO RESEARCH ACTIVITIES)

- [25] [CMS Collaboration], “Search for low-mass pair-produced dijet resonances using jet substructure techniques in proton-proton collisions at a center-of-mass energy of $\sqrt{s} = 13$ TeV”
CMS-PAS-EXO-16-029 (2016) [link to pdf](#).
I was chair of the “*Analysis Review Committee*” for the scrutiny of this analysis within the CMS collaboration.

- [26] [CMS Collaboration], “Search for Narrow Resonances using the Dijet Mass Spectrum in pp Collisions at $\sqrt{s}=7$ TeV”
CMS PAS EXO-11-094 (2012) [link to pdf](#).
I am the main developer of the novel trigger, data acquisition, and analysis strategy employed in this search to recover sensitivity to new physics at dijet masses below 1 TeV.
- [27] [CMS Collaboration], “Search for Pair Production of First Generation Scalar Leptoquarks at the CMS Experiment”
CMS PAS EXO-08-010 (2009) [link to pdf](#).
I am co-author and one of the four analysts (from University of Maryland group) of this public CMS Physics Analysis Summary based on MC simulation.
- [28] [CMS Collaboration] “Data Parking and Data Scouting at the CMS Experiment” CMS DP-2012/022 (2012) [link to pdf](#).
I’m the editor of this public CMS document.
- [29] [CMS Collaboration], “Performance of Missing Transverse Energy Reconstruction in $\sqrt{s}=900$ and 2360 GeV pp Collision Data”
CMS PAS JME-10-002 (2010) [link to pdf](#).
I worked on the section related to calorimeter MET cleaning algorithms and performances.

CONFERENCE PROCEEDINGS

- [30] “Searches for BSM physics in final states with jets and leptons+jets at CMS”
F. Santanastasio
Proceedings will be published in European Physical Journal Web of Conferences.
Prepared for the 5th International Conference on New Frontiers in Physics, Kolymbari, Crete, 6-14 July 2016
- [31] “Search for heavy resonances decaying to bosons with the ATLAS and CMS detectors”
F.Santanastasio
Nucl. Part. Phys. Proc. 273-275, 649 (2016).
Prepared for the XXXVII International Conference on High Energy Physics, Valencia, Spain, 2-9 July 2014
- [32] “Searches for Heavy Hadronic Resonances with the ATLAS and CMS detectors at the LHC”
F. Santanastasio and C. Doglioni
PoS LHCPP2013, 015 (2013).
Prepared for the Workshop LHCpp 2013 - VI Workshop Italiano sulla Fisica p-p a LHC, INFN - Sezione di Genova, Genova, Italy, 8-10 May 2013
- [33] “Exotic Phenomena Searches at Hadron Colliders”
F.Santanastasio
arXiv:1301.2521 [hep-ex] (2013).
Prepared for the XXXII Physics in Collision 2012 conference (PIC2012), Strbske Pleso, Slovakia, 12-15 September 2012
- [34] “Exotica searches at the CMS experiment”
F.Santanastasio
Proceedings of the XLVIth Rencontres de Moriond 2011 Electroweak Interactions and

Unified Theories, 125-132 (2011), edited by Etienne Auge, Jacques Dumarchez, and Jean Tran Thanh Van © The Gioi Publishers.

Prepared for XLVIth Rencontres de Moriond 2011 Electroweak Interactions and Unified Theories, La Thuile, Aosta Valley, Italy, 13-20 March 2011

- [35] “Searches With Early Data At CMS”
F.Santanastasio
PoS DIS2010, 206 (2010).
Prepared for 18th International Workshop on Deep Inelastic Scattering and Related Subjects (DIS 2010), Florence, Italy, 19-23 Apr 2010
- [36] “Prospects for Exotica Searches at ATLAS and CMS Experiments”
F.Santanastasio
Il Nuovo Cimento Vol.32 C, N.3-4 ncc9484 (2009).
Prepared for Incontri di Fisica delle Alte Energie (IFAE 2009), Bari, Italy, Apr 2009

INTERNAL NOTES OF THE CMS COLLABORATION (RELATIVE TO RESEARCH ACTIVITIES)

- [37] “Absolute residual jet energy corrections with γ +jet events at 13 TeV”
F. Santanastasio *et al.*
CMS AN-2016/344 (2016)
I am one of the two authors of this internal note based on analysis of collision data. I supervised Federico Preiato (PhD student in Sapienza University of Rome) who is the main analyst.
- [38] “Search for narrow resonances decaying to dijets in pp collisions at $\sqrt{s} = 13$ TeV using 12.9 fb^{-1} ”
F. Santanastasio *et al.*
CMS AN-2016/202 (2016)
I am the editor of this internal note. I supervised Federico Preiato (PhD student in Sapienza University of Rome) in Sapienza, University of Rome working on the calibration of online reconstructed jets employed in the scouting analysis.
- [39] “Search for narrow resonances using the dijet mass spectrum with 2.45 fb^{-1} of proton-proton collisions at $\sqrt{s} = 13$ TeV”
F. Santanastasio *et al.*
CMS AN-2015/175 (2015)
I am the editor of this internal note presenting results on analysis of collision data. I supervised Giulia D’Imperio (PhD student in Sapienza University of Rome) who is the main analyst.
- [40] “Search for narrow resonances using the dijet mass spectrum in proton-proton collisions at $\sqrt{s}=13$ TeV (Phys14 MC analysis)”
F. Santanastasio *et al.*
CMS AN-2015/063 (2015)
I am the editor of this internal note concerning a feasibility study of the dijet search. I supervised Giulia D’Imperio (PhD student in Sapienza University of Rome) who is the main analyst.
- [41] “Search for dijet resonances at $\sqrt{s} = 8$ TeV with data scouting”
F. Santanastasio *et al.*

CMS AN-2014/104 (2014)

I am co-editor of this CMS analysis note based on collision data and one of the two main analysts.

- [42] “Search for a BSM resonance decaying to W vector bosons in the semileptonic final state”

F. Santanastasio *et al.*

CMS AN-2013/045 (2013)

I am the contact person of this CMS analysis based on collision data and one of the four main analysts. I supervised one of the two main analysts working on this search (a PhD student from Peking University, China). The analysis has been published in 2014 in combination with a complementary search for ZZ resonances (EXO-12-022).

- [43] “Search for a BSM resonance decaying to Z vector bosons in the semileptonic final state”

F. Santanastasio *et al.*

CMS AN-2013/040 (2013)

I’m part of the analysis group involved in this CMS search which is constituted by about 10 people from CERN, KIT, Peking University, SPRACE, and University of Perugia. The analysis has been published in 2014 in combination with a complementary search for WW resonances (EXO-12-021).

- [44] “Search for Narrow Resonances using the Dijet Mass Spectrum in pp Collisions at $\sqrt{s}=8$ TeV with full 2012 dataset”

F. Santanastasio *et al.*

CMS AN-2012/455 (2012)

I am the contact person of this CMS analysis based on collision data. I supervised the main analyst working on this search (a PhD student from Cukurova University, Turkey). A public preliminary result has been released by the CMS collaboration on February 2013 in view of the Moriond/EW conference. The analysis is aiming for publication in 2015 in combination with a search for high mass resonances decaying to pairs of b-quarks.

- [45] “Search for Narrow Resonances using the Dijet Mass Spectrum in pp Collisions at $\sqrt{s}=8$ TeV”

F. Santanastasio *et al.*

CMS AN-2012/229 (2012)

I am the contact person of this CMS analysis based on collision data. I supervised one of the two analysts working on this search (a PhD student from Cukurova University, Turkey). This analysis has been published in 2013.

- [46] “Search for Dijet Resonances in the Dijet Mass Spectrum in pp Collisions at $\sqrt{s}=7$ TeV”

F. Santanastasio *et al.*

CMS AN-2012/012 (2012)

I am one of the two analysts (from a group of about 10 people from various institutions including CERN) of this CMS analysis based on 4.7 fb^{-1} of pp collision data collected in 2011. I am the main developer of the novel trigger, data acquisition, and analysis strategy employed in this search to recover sensitivity to new physics at dijet masses below 1 TeV. This analysis has been published in 2012 in combination with a complementary search for heavy resonances decaying in pairs of b-quarks.

- [47] “Search for heavy resonances in the W/Z-tagged dijet mass spectrum in pp collisions at 8 TeV”

- F. Santanastasio *et al.*
 CMS AN-2012/393 (2013)
 I'm part of the analysis group involved in this CMS search which is constituted by almost 10 people from CERN, John Hopkins University, and *L'Institut de Physique Nucleaire de Lyon* (IPNL). This analysis has been published in 2014.
- [48] "Search for $qW/qZ/WW/WZ/ZZ$ Resonances in the W/Z-tagged Dijet Mass Spectrum from 7 TeV pp Collisions at CMS"
 F. Santanastasio *et al.*
 CMS AN-2011/524 (2011)
 I'm part of the analysis group involved in this CMS search which is constituted by almost 10 people from CERN, John Hopkins University, and *L'Institut de Physique Nucleaire de Lyon* (IPNL). This analysis has been published in 2013.
- [49] "Search for Pair-production of First Generation Scalar Leptoquarks in pp Collisions at $\sqrt{s}=8$ TeV"
 F. Santanastasio *et al.*
 CMS AN-2013/109 (2013)
- [50] "Search for First-Generation Scalar Leptoquarks in pp Collisions at $\sqrt{s}=7$ TeV using the CMS Detector"
 F. Santanastasio *et al.*
 CMS AN-2011/492 (2011)
 I am one of the two analysts (supervising a PhD student from Princeton University) of this CMS analysis based on 4.7 fb^{-1} of pp collision data collected in 2011. This analysis has been published in 2012 in combination with a complementary second-generation leptoquark search.
- [51] "Search for Pair Production of First-Generation Scalar Leptoquarks Using Events Produced in pp Collisions at $\sqrt{s}=7$ TeV Containing One Electron, Two Jets and Large Missing Transverse Energy"
 F. Santanastasio *et al.*
 CMS AN-2010/361 (2010)
- [52] "Search for Pair Production of First Generation Leptoquarks Using Events Containing Two Electrons and Two Jets Produced in pp Collisions at $\sqrt{s}=7$ TeV"
 F. Santanastasio *et al.*
 CMS AN-2010/230 (2010)
- [53] "Search for Pair Production of First Generation Scalar Leptoquarks at the CMS Experiment"
 F. Santanastasio *et al.*
 CMS AN-2008/070 (2009)
- [54] "Results of a visual scan of high MET events in 7 TeV pp collision data"
 F. Santanastasio *et al.*
 CMS AN-2010/219 (2010)
- [55] "Commissioning of Uncorrected Missing Transverse Energy in Zero Bias and Minimum Bias Events at $\sqrt{s}=900$ GeV and 2360 GeV"
 F. Santanastasio *et al.*
 CMS AN-2010/029 (2010)

- [56] “Optimization and Performance of HF PMT Hit Cleaning Algorithms Developed Using pp Collision Data at $\sqrt{s}=0.9, 2.36$ and 7 TeV”
F. Santanastasio *et al.*
CMS DN-2010/008 (2010)
- [57] “InterCalibration of the CMS Barrel Electromagnetic Calorimeter Using Neutral Pion Decays”
F. Santanastasio *et al.*
CMS DN-2007/013 (2007)
